As teachers we find ourselves in the position of trying to find the best ways to help our students learn and keep that learning past the initial lesson. Focusing on the connections between the tools and methods that we use and their overall learning can bring to light the ways that we can create a truly effective learning environment. We should focus on memory in regards to learning. ~~We have to focus on how short-term, working, and long-term memory are all connected and how metacognition plays an integral role in the whole process.~~ We can not just think that because I taught something, the students will have learned it. Bruning, Schraw & Norby discuss that if the approach to learning is shallow and basic then the learning will be too, as opposed to when students approach the learning in a more meaningful and complex way. (2011)

Patrick Donovan

What in the world?

**Pencil Breaks** Similar to the show Prison Break, but without the declining storyline. We call this one the poor man's game. All you need to play is a pencil and the technique. What you do to play: get a pencil, carefully extract the eraser without leaving any underground, bite down on the metal part til you have a crude prison shank, and then you take turns slashing downward at your opponent's pencil. The trick is to buy the mechanical pencils that look like real ones. Cheating? Nay. Elaborate.

**Streets of Rage** You may remember this little gem created by Sega: The Genesis. Throw in some exceptional 3d graphics, mixed with a tough level 5, overnited bosses, dangerous, chains, metal bats, and jean shorts...you've got yourself a herry.

**Talking Whiz Kid** Kinda like a speak and spell but, well, almost exactly like speak and spell, but without the verbal response. That little red & blue c3po befriended me when no other would, and gave me the skills to write it all down in my diary. That robotic "dadaduhhda" is like chewing on a magic cloud. Thank you, less popular version of speak & spell, thank you.

**Super Smash Brothers** None of that gamecube or wii junk. I'm talking the greatest game ever played on the greatest console ever played, Nintendo 64. Not only did this shape my junior high, high school, and college career, but it made me the man I am today. I don't want to lessen its glory with cheap words and gimmicks. Just play it. Domination. Exclamation. Exoneratation.
